Company Overview

Senator Trading Company was established many years ago by building a large hall to produce all kinds of wires and cables according to the Middle East industrial needs. At first, our products were limited to producing all types of wire in a workshop. Nevertheless, after a few years of establishing the company, we increased the variety of our products. We added more production lines to the company by building another hall with an area of 3000 square meters. Due to the importance of quality control, this company has equipped its factories' laboratories with the most advanced equipment so that the products after production can be checked in terms of quality and compliance with international standards.

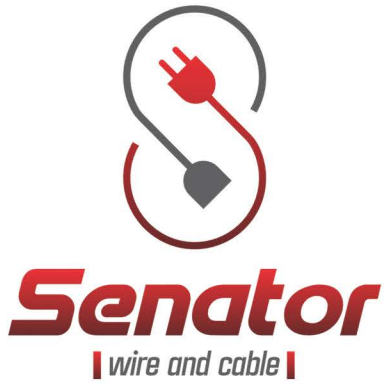

Business Description

Wireless and cables are considered essential products worldwide, and if these products are not available, the world will face many problems. The first use of wires and cables in the world dates back to 1830 AD. At that time, shipping companies used cables as their working tools; But little by little and with the progress of science, wires with copper conductors were produced and used. After that, in 1876, cables were produced with plastic coverings, which significantly reduced the risks, and were covered with a type of natural rubber called gutta-percha. Today,

this product is one of the best-selling products in the markets of all countries of the world; therefore, many countries in the world have set up factories for the production of these products, among which China, with the most significant amount of production in this area, has been placed in the first place in the production of this product in the world. After that, the countries of America and Japan are in the second and third ranks of these productions, respectively. In the meantime, by increasing its production in terms of quantity and quality, Senator Trading Company has been able to meet the needs of many traders and merchants in this area and become a prominent brand in it.

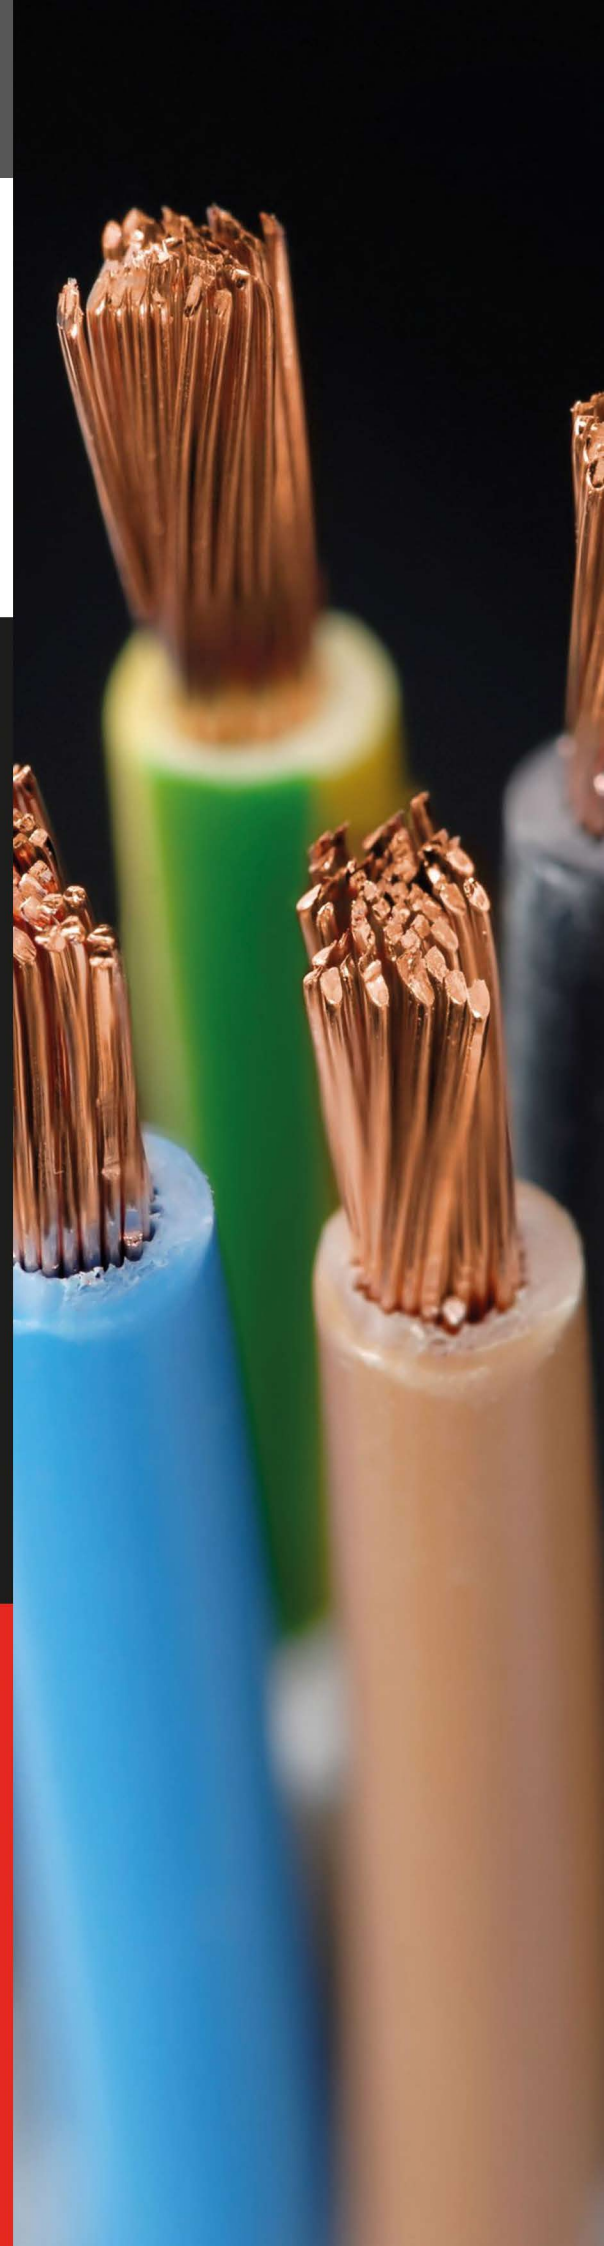

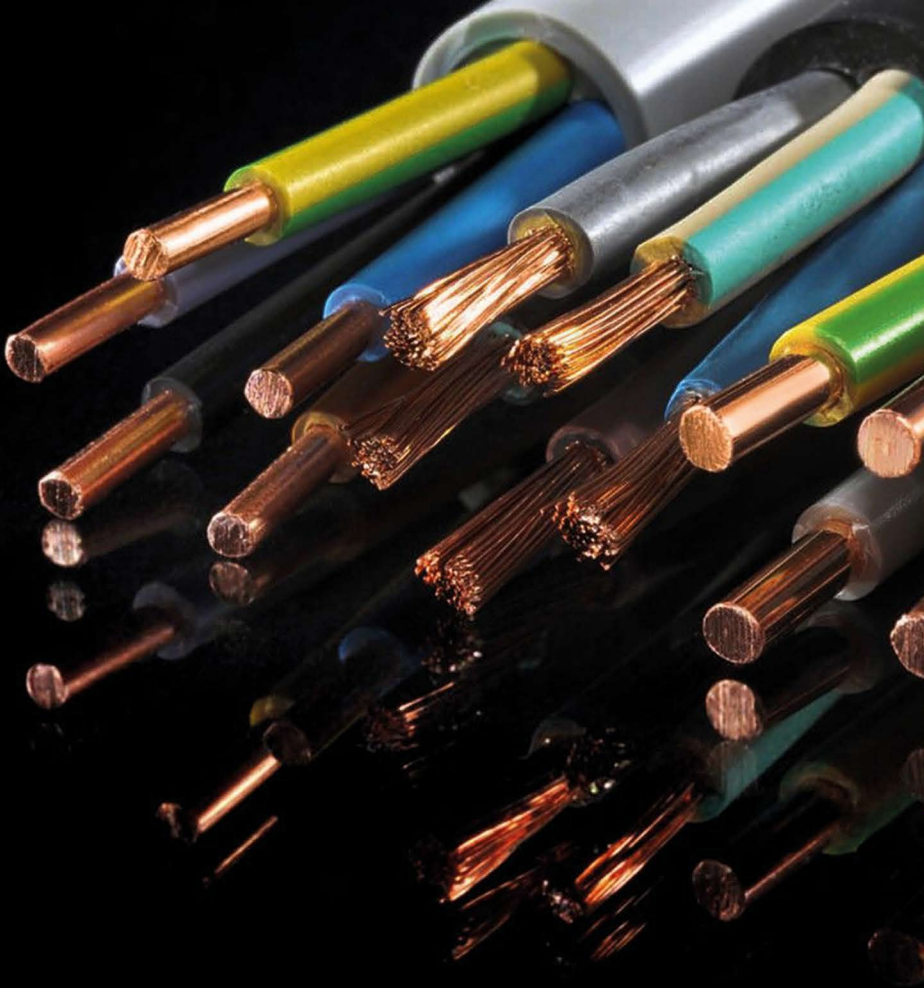

Vision and values

The vision of Senator Trading Company for the near future is to become a global brand in this field by diversifying its products along with its quantitative and qualitative increase. Moreover, this company has chosen values for itself, some of which are as follows:

- Belief in teamwork and group work
